EXPLORE
Accessibility

with OLC's Accessibility Skills Pathway

Develop skills to support learner accessibility while earning an OLC badge. In this pathway, participants will explore the framing of disability-related language, spot barriers for learners, assess course material accessibility, use universal design for learning, address stereotypes, and create a digital accessibility plan.

Choose 3 of these workshops...

Digital Accessibility: Developing a Strategic Plan

Is it time to implement or revisit your institution's digital accessibility strategy? Explore the strategies and tools you need to implement a web accessibility plan at your institution.

Accessible Course Design Using WCAG

Take a deeper dive into the principles and guidelines of the Web Content Accessibility Guidelines 2.0, evaluate the accessibility of your course materials, and develop an action plan for course improvements.

Practical Applications for Universal Design for Learning (UDL)

Gain an understanding of the core concepts of Universal Design for Learning and how to apply them to an online course setting.

Reframing Disability: Language, Media, and Universal Design

Explore how disability is framed in society and education, and learn how to design equitable and inclusive online spaces.

ADA & Digital Accessibility Self-Paced

Gain an understanding of the legal framework for accessibility in online education and how learners with disabilities participate in online classes
